

company, where applicable, to identify and classify the charge in terms of the system of accounts prescribed by the regulatory authorities to which it is subject. The information provided to associate public-utility companies must provide a summary of the accounts by service provided and showing the charges, classified as direct cost, indirect cost, and compensation for use of capital.

**§ 367.28 Methods of allocation.**

Indirect costs and compensation for use of capital must be allocated to projects in accordance with the service company's applicable and currently effective methods of allocation. Both direct and allocated indirect costs on projects must be assigned among those companies in the same manner. The cost accumulation system must identify the methods of allocation and the accounts to be charged. Companies must be notified in writing of any change in the methods of allocation.

**§ 367.29 Compensation for use of capital.**

A servicing transaction is deemed to be performed at no more than cost if the price of the service does not exceed a fair and equitable allocation of expenses plus reasonable compensation for necessary capital procured through the issuance of capital stock. Interest on borrowed capital and compensation for the use of capital must only represent a reasonable return on the amount of capital reasonably necessary for the performance of services or construction work for, or the sale of goods to, associate companies. The compensation may be estimated and must be computed monthly. The amount of compensation must be stated separately in each billing to the associate companies. An annual statement to support the amount of compensation for use of capital billed for the previous 12 months and how it was calculated must be supplied to each associate company at the end of the calendar year.

**§ 367.30 Cost accumulation system for associate companies.**

Service companies must maintain a detailed classification of service costs,

that permits costs to be identified with the functional processes of the associate companies served. To permit the classification, each service company must maintain a cost accumulation system, as described in Definitions § 367.1(a)(12), for accumulating reimbursable costs and charges to the associate companies served, and maintain time records for all service company employees in order to support the accounting allocation of all expenses assignable to the types of services performed and chargeable to the associate companies served. Service company employee records must permit a ready identification of the hours worked, account numbers charged, and other code designations that facilitate proper classification.

**Subpart C—Service Company Property Instructions**

**§ 367.50 Service company property to be recorded at cost.**

(a) All amounts included in the accounts for service company property must be stated at the cost incurred by the service company, except for property acquired by lease which qualifies as capital lease property under General Instructions in § 367.18, Criteria for classifying leases, and is recorded in Account 101.1, Property under capital leases (§ 367.1011).

(b) When the consideration given for property is other than cash, the value of the consideration must be determined on a cash basis (*See, however*, Definitions § 367.1(a)(11)). In the entry recording the transaction, the actual consideration must be described with sufficient particularity to identify it. The service company must be prepared to furnish the Commission the particulars of its determination of the cash value of the consideration, if other than cash.

(c) When property is purchased under a plan involving deferred payments, no charge must be made to the service company property accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(d) The service company property accounts must not include the cost or
